Dear Sirs:

Please send me the guidelines and forms for applying for a research grant. We have been following a population of approximately 3000 randomly selected people since 1972 with the objective of elucidating the natural history of airways obstructive disease. In a subset of this population, certain patterns are beginning to emerge. We propose to study such individuals in depth to characterize the site and nature of the airways problem by physiological and radiologic methods. We wonder whether the Council For Tobacco Research would be willing to support such research. Any information you could provide would be most welcome.

Very sincerely,

Ronald J. Knudson, M.D.
Professor of Internal Medicine

RJK/amr
